She work for the Unit for Health Professions and Human Resources of the NHS, coordinating health workforce planning process at national level, supporting activities of the Unit for Health Professions and Human Resources of the NHS by statistical analysis, data reporting and scenario development.

Presenting:

From the Handbook to the Pilot Projects

Summary:

The next challenge for WP5 will be the application of the Handbook on planning methodologies to the reality of Italian Regions and Portugal.

From January 2015 the Pilot Project will be operative with a close collaboration among the Central Government, Regions and all the other stakeholders involved in the planning process.

During the speech the working plan of the project will be presented and described.
