Planning and Forecasting

The Minimum Data Set in the WP5

In Joint Action agreement WP5 have to define a Minimum Data Set (MDS):

1. the MDS is made of a list of mandatory parameters and needed for planning and forecasting but also monitoring the health workforce strategy;
2. the minimal data set aimed at being the data foundation for MSs on which more appropriate data collections and registers could be build for enhanced planning and forecasting;
3. one of the indicator of the WP5 results, is the adoption of the Minimal dataset as national/ regional standard in a significant number of Countries.

The Minimum Data Set in the WP5

In the WP5 plan:

- we have to defining the criteria / requirements of the minimum data set;
- we have to produce the first draft of the minimum data set;

by September 2013

- we have to finalize and agree on the MDS
by October 2013
(milestone)

- we have to deliver the MDS
by November 2013
(deliverable 051).

What's in scope of the workshop

In these 2-days workshop we want:

- ▶ to agree on founding principles, targets, potential Users and definitions of MDS;
- ▶ to qualify a set of requirements for MDS;
- ▶ to define the draft of the **Minimum Data Set**.

Now we are going to have an...
